

A conference on

Current Issues in Independent Practice

FIPO National-MAC and Consultant Meeting

Wednesday 24th October 2012
9.15 for 9.45

at

Royal College of Obstetricians
and Gynaecologists

27 Sussex Place
Regent's Park
London NW1 4RG

Organised by

This meeting is organised by FIPO (Federation of Independent Practitioner Organisations) and is by invitation only for the profession. The purpose of the meeting is to discuss recent changes in the private healthcare market with respect to the insurers, hospitals and the current Competition Commission Market Study. Cost and quality were identified in the recent OFT report as key features of consultant practice. The Medical Advisory Committees are the main route of clinical governance and professional advice to management in the independent sector and thus any proposals that may be made to the Competition Commission by FIPO or other professional groups over quality or any other related matters will need the support of MAC Chairmen or their deputies (or leading governance consultants).

At this meeting there will be a review of the current rapidly changing scene and a discussion about some of the proposals being made to the Competition Commission by the main private hospital groups and insurers. It is important that MAC Chairmen are aware of the professional response to these issues as there will be a need to get agreement from MAC Chairmen who would need to implement these professional decisions at a local level.

Speakers are from FIPO, competition lawyers, PHIN (Private Healthcare Information Network - the company providing the "quality arm" to the main hospital groups) and from WPA.

Current Issues in Independent Practice

Nuffield Hall, Royal College of Obstetricians and Gynaecologists
